

Drug-Free Workplace Services

Training • Drug/alcohol testing & resulting • Assessment & treatment plans

TriHealth Corporate Health partners with employers to create and maintain safe, drug-free workplaces—providing support from prevention to testing, results management, assessment, and return-to-work services.

Prevention & Training

- Supervisor and employee education aligned to Ohio BWC's Substance Use Prevention & Recovery (SUPR) program and Department of Transportation (DOT)

Testing & Program Management

- Random Program administration: selection, notifications, and compliance documentation for DOT and non-DOT testing
- Testing at five TriHealth Occupational Medicine clinics across Greater Cincinnati for urine drug screens and breath alcohol tests
- Pre-employment, random, post-accident, reasonable suspicion, return-to-duty, and follow-up testing
- Medical Review Officer (MRO) oversight and secure chain-of-custody for accurate, compliant results

Assessment & Treatment Plans (SAP/Substance Use Assessments)

- Substance Abuse Professional (SAP) evaluations for DOT and non-DOT cases to ensure compliance
- Substance use assessments to gauge risk, recommend treatment, and guide return-to-duty
- Expertise to determine marijuana use vs. abuse—powered by SAP and MRO collaboration—to drive confident, data-backed recommendations
- Navigation to find available funding through the BWC
- Tailored treatment plans from education to outpatient or inpatient care
- Case management and follow-up to confirm completion and coordinate reinstatement testing

Why TriHealth Corporate Health?

- Integrated model spanning Occupational Medicine, Employee Assistance Program (EAP), and wellbeing—one partner from prevention to recovery
- Certified SAP clinicians with decades of experience and DOT-compliant processes
- Certified MROs and DOT-qualified collectors
- Expertise in guiding employers through BWC funding opportunities
