

## **Dr. Kiran Poudel, MD**

### **Neurocritical Care Specialist TriHealth**

Dr. Kiran Poudel is a board-certified neurocritical care specialist at TriHealth Hospital, where he has served as a neurointensivist since 2013. He began his medical career in 2000 and earned his medical degree in 2002 from Nepal.

Dr. Poudel completed his residency training at Albert Einstein College of Medicine in the Bronx, New York, in 2009. With a strong interest in the care of patients with complex neurological and neurosurgical conditions, he pursued advanced subspecialty training in neurocritical care, completing his fellowship at Massachusetts General Hospital / Harvard University in 2013.

Since joining TriHealth, Dr. Poudel has been dedicated to the management of critically ill neurological patients, integrating evidence-based medicine with a collaborative, multidisciplinary approach to optimize outcomes. His clinical interests include acute brain injury, stroke-related critical illness, and neurologic emergencies. He also serves as a Site Principal Investigator for the Librexia STROKE Study, contributing to clinical research aimed at advancing stroke care.

Dr. Poudel is deeply committed to medical education and particularly enjoys teaching residents, advanced practice providers (APPs), and medical students. He values mentorship and strives to foster a supportive and engaging learning environment within the neurocritical care setting.
