

Advanced Wound Healing Centers

The clinical team at the Advanced Wound Healing Centers includes board-certified physicians and nurse practitioners who have received advanced training in wound management. Our multidisciplinary team encompasses internal medicine, general surgery, vascular surgery, podiatry and plastic surgery.

Patients are seen weekly and discharged to the referring physician for follow-up upon a healing outcome. Our goal is to accelerate a patient's recovery process so they can return to a life free from the pain and discomfort of chronic and non-healing wounds.

Todd Adams, DPM
