

TriHealth Cancer & Blood Institute

TriHealth Cancer and Blood Institute provides patients with a full Multi-Disciplinary (MDC) program of care, with specialists in specific areas of cancer treatment. These committees have numerous specialty physicians focused on one cancer system (e.g. breast, GI, lung and melanoma). They see patients in one visit to determine a plan of care. Patient advocates ensure seamless logistical, emotional and medical support throughout the cancer journey.

With cancer specialists and facilities located throughout the Cincinnati region, care is provided close to where patients live and work. TriHealth Cancer and Blood Institute provides superior patient experience, through integrated cancer care, with cutting-edge treatments and technologies that may be accessed at one location.
